

Lower your payment processing cost with payment solutions designed for dentists

Managing healthcare payment processing for dentists can be complex and expensive. We understand the challenges of balancing good patient care with strong business performance.

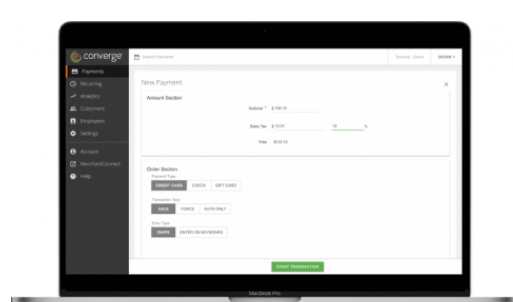

Flexible in-person payment methods including contactless options

Our carefully selected line of payment terminals allow you to easily and securely process payments. Low cost rental options put any model in your reach. A virtual terminal option removes the need for special payment hardware. Use any computer or tablet browser. All equipped with powerful security so sensitive cardholder and transaction data is secured.

Credit card terminals

Terminals allow swipe, tap, Apple Pay, or chip-and-pin payments. They can integrate into practice management software and are available on low cost rental programs.

Virtual Terminal

No hardware needed. The virtual terminal lets you turn your computer into a credit card terminal. This is the fastest and easiest way to take payments.

Virtual Terminal & Swiper

An optional swiper plugs into your computer. Patients can swipe their credit card to increase speed, minimize contact, and lower interchange fees.

Convenience for patients with a self-serve payment page that's fully branded

Give utmost flexibility to your dental patients by allowing them to pay remotely from their home over their computer or mobile device. A branded hosted payment page on your website gives you the ability to accept payments at any time. Once the payment is complete, a branded email receipt is sent to the patient.

"I've been looking into ways I can save on costs in my dental practice. I came across a company in Canada called Clearly Payments, through a dentist friend. They offer transparent fees and monthly subscription costs or cost plus depending on what is most beneficial for the business. It will save me about \$400 a month!"

Send email invoices or create payment plans for dental patients

Create invoices and payment plans in seconds. The invoicing system lets you manage your patients and their payments quickly and simply. Store customer patient information, automatically send reminders, and be notified of overdue payments. Payment plans lets you create automatic recurring payments on customized schedules

Take payments over the phone

The virtual terminal and credit card terminals easily support taking payments over the phone. With a few clicks, you are taking payments securely. The virtual terminal lets you securely store patient contact information and credit card numbers to speed up the payment process for repeat patients. Custom branded receipts maintain the brand of your practice.

Get started now on Canada's first membership plan and join us on our mission to lower the cost of accepting payments

- Access to wholesale payment processing rates
- A simple and transparent monthly fee
- No cancellation fees or hidden costs
